Cleaning & Maintenance Services for Facilities and Industrial Environments

Sponge-Jet's low dust, reusable media abrasives are the choice of Operations Professionals, Process Engineers, Maintenance Managers and Supervisors for cleaning, decontaminating or removing failed industrial coatings, while increasing productivity compared to other maintenance and cleaning technologies.

- Reduce maintenance shutdown time with minimal interruption
- Blast near rotating production equipment without damaging ricochet
- Capture dust and contaminants without the use of water
- Clean and degrease without water, chemicals or liquid detergents
- Control blasting for precise cleaning/depainting
- Selectively strip coatings and remove contaminants
- Greatly reduce fugitive emissions compared to conventional abrasives
- Inspect during blasting with superior visibility
- Reduce waste to 90% by recycling Sponge Media
- Up to 20 times faster than hand-wiping or power tools

Contaminants and Substrates...

- | | |
|-----------------------------------|---|
| - environmental pollutants / soot | - structural steel / aluminum / stainless steel |
| - paint / graffiti | - fiberglass |
| - oil / aerosol clean up | - corrugated roofing |
| - adhesives | - granite / stone |
| - lead or PCB based paint | - brick/masonry block/concrete |

Sponge-Jet Customers and Applications...

Dow Chemical Co	Kraft Foods	SC Johnson
Pepperidge Farms	Smurfit - Stone	American Freightways
Novartis AG	Dunlop Tire Corporation	Disney World
Johnson's Wax	Anheuser-Bush Company	Daimler AG
Molson Coors Brewing Co	PPG Industries	Westinghouse Electric Corp
Nestlé Purina	McCain Foods Limited	Alcoa, Inc.
US Post Office	Johnson and Johnson	Firestone Industrial Products
New York Life Insurance Co	Metropolitan Museum of Art	RJR Nabisco, Inc.

- | | |
|---|---|
| - Profiling/paint preparation of new structural steel and rust removal on old structural steel | - Removing failed paint from zinc-coated corrugated ceiling panels |
| - Removing environmental staining, biological growth, pigeon fouling or patina from exterior surfaces | - Sponge blasting on roof top structures or tanks |
| - Removing smoke and soot damage from facility ceiling and walls | - Spot-blasting problematic, high-wear areas on manufacturing equipment |
| - Cleaning stainless steel drying ducts and/or conveying equipment | - Removing oily residue from manufacturing equipment |
| | - Removing Corrosion Under Insulation (CUI) |
