**LIC. DAVID ANDRADE EVERARDO**  
Sponyat-Jet, S.A. de C.V.

Subject: Achievement of Objectives

By this letter, it is a pleasure to recognize the great performance of Sponya JET and especially what you have achieved while aligning your interests with those of our company - all looking toward a common goal. Speaking specifically of achieving our scheduled objectives for Project 0.394 on the BDP, Atlantic Challenger Platform. It is especially important to mention that most achievements have been accomplished using Sponge-Jet technology. Products that we have been using for many years with nothing but excellent results, due to the fact the customer, Pemex Exploration and Production (PEP), continues regular operations while we use it. Sponge-Jet's main characteristics/benefits are suppression of dust and ricochet. Therefore we consider teaming up DIAVAS and Sponya JET as the right choice. And we believe the result and the achievement of the goals are the proof. I reiterate my congratulations for the great performance obtained since the beginning of this contract, since February, 2014. I invite you to keep working as you have been up to this very moment.

Nothing further but cordial wishes.

Regards,

**ING. FRANCISCO SÁNCHEZ PINEDA.**  
Superintendente de Operaciones Mantenimiento  
Constructora Subacuática Diavaz.
